Thru: Bob Mandel (T-3-2) *Comm for KGS 1-26-83*
Chief, Field Inspections Section

Thru: Kathleen G. Shimmin (T-3)
Chief, Compliance and Response Branch

Enclosed for your review is a Preliminary Assessment for Union Manufacturing Inc. This facility is located on Indian land in the Pima-Chandler Industrial Park.

During the RCRA ISS inspection on December 1, 1982 I observed uncontained releases of hazardous waste in several locations. All waste areas are unfenced, and accessible from the parking lot via an unpaved road. Up to 21 potential violations of RCRA were observed, including lack of groundwater monitoring. According to the RCRA criteria for determining an imminent and substantial endangerment, this facility appears to qualify. A compliance order to Union Manufacturing is currently being drafted by T-2-1.

Included with the Preliminary Assessment are photographs, copies of the inspection narrative and checklist, a facility diagram, and relevant correspondence.
